RE: Site Inspection, Georgia Pacific Corporation, Eagle Canyon Mine, M/015/050, Emery County, Utah

Date of Inspection: July 27, 1995
Time of Inspection: 12:50 - 13:10
Conditions: Clear, hot
Participants: Neil Simmons, BLM, San Rafael Resource Area; Tony Gallegos, DOGM

Purpose of Inspection: To evaluate the current status of the site

During this inspection, the site was inactive. Several pieces of large equipment were still present on the site. The first area visited was what used to be the storage area. This area has now been regraded. This area was the storage location for fuel tanks and the explosive magazine. In addition to regrading and re-topsoiling this area, they have also regraded a portion of the pit and moved a stockpile of gypsum boulders off this part of the site (the northwest end of the site). A new storage area with fuel tanks and equipment has been created.

We examined the site in general. Photographs were taken of the mine site features. This site is currently permitted for up to 25 acres of disturbance with the BLM.
